Introduction to Metaphysics: From Parmenides to Levinas Jean Grondin

The first history of metaphysics to respect both the analytical and Continental schools while also transcending the theoretical limitations of each, this compelling overview restores the value of metaphysics to contemporary audiences. Grondin follows the theological turn in metaphysical thought during the Middle Ages. He engages with the twentieth-century innovations that shook the discipline, particularly Heidegger's notion of Being and the rediscovery of the metaphysics of existence (Sartre and the Existentialists), language (Gadamer and Derrida), and transcendence (Levinas). Metaphysics is often dismissed as a form or epoch of philosophy that must be overcome. Yet a full understanding of its platform and processes reveal a cogent approach to reality, and its reasoning has been foundational to modern philosophy and science.
