Volume 4 is a complete guide to programming with the X Toolkit Intrinsic, the library of C language routines that facilitates the design of user interfaces with reusable components called widgets. It provides concepts and examples that show how to use the various X Toolkit routines. The first few chapters are devoted to using widgets; the remainder of the book covers the more complex task of writing new widgets. Uses the Motif 1.2 widget set in examples and covers X11 Release 5. Volume 4 includes:

- Introduction to the X Window System.
- Building applications with widgets.
- Constructing a bitmap editor with widgets.
- An overview of each widget in the widget set.
- Basic widget methods.
- Events, translations, and accelerators.
- Event handlers, timeouts, and work procedures.
- Resource management and type conversion.
- Selections and window manager interaction.
- Geometry management.
- Menus, gadgets, and cascaded pop-ups.
- Miscellaneous techniques.
- Comparison of Athena, OSF/Motif, and AT&T OPEN LOOK widgets.

This book is designed to be used with Volume 5, *X Toolkit Intrinsic Reference Manual*, which provides reference pages for each of the Xt functions, the widget classes defined by Xt, and the Athena widget set.
