### Where is God?

**Scientific Millennium Discovery of SPIRITUAL BRAIN CELLS** Richard L. Harding

It appears God's job-prospectus is thousands of years old. Revolutionary changes are creating new questions never before asked by mankind, such as Where Is God? What does God look like? What about the newest scientific discovery of spiritual brain cells found in the frontal lobes of the forehead? What about death? etc.

Please allow me to introduce a book that has been 68 years in the writing. After my first visit to a funeral home and then experiencing an end-of-the-world scenario over the radio as a youngster, my life has been a quest for the answer to one basic question, Where Is God?

Religious fiction dominates the literary marketplace. But, God is not fiction, but fact. My journey into light has sought for real answers to settle the endless human issues of terrorism, fears, death, loneliness, anxiety and eternity.

9-11-01. A day of infamy when the world became permanently shocked, shattered and vulnerable from terrorist attacks. The old, standby answers failed. But the recently discovered spiritual brain cells came as a 21st century scientific terrorism cure for all mankind.

Where Is God? opens the door, easily and effortlessly, to John 10:30 - "I and the Father are one."
