Maldives - The Underwater Kingdom opens with a chapter covering the small percentage of this island nation which is above sea level. Tiny though that percentage may be, the 1,192 islands of the Maldives archipelago are home to a fascinating culture which has lived in harmony with the ocean for centuries. Skipping ahead to the final chapter you'll learn about the threats that the Maldives faces in our environmentally uncertain times and the efforts being made to conserve both marine resources and the Maldivian way of life. Sandwiched between the scene-setting intro and the ever present threats is the stunning underwater gallery. The Maldives is one of the most diverse and exciting underwater realms on the planet with colour saturated coral reefs and vicious current-swept channels where pelagics feed in the nutrient rich waters. The photographic team at Scubazoo have supplied the underwater cameramen and expertise for most of the big players in documentary-making - including the BBC, ITV, National Geographic, CNN and the Discovery Channel. Their first coffee-table book, on Sabah, remains one of my favourite underwater books, and was followed by international best-seller Reef. The new book concentrates on the Maldives, capitalising on the contacts and reputation Scubazoo has built up over the years providing in-house videographers to liveaboards and resorts in the archipelago. It comes with a foreword from President Nasheed, who reiterates his commitment to protecting the marine environment, and his belief that environmentalism can co-exist with economic development. The authors have somewhat arbitrarily divided the book into sections on seascapes, reef critters, fish life, schooling, turtles etc. But in the end it's the images that will draw you in: blissful underwater landscapes of healthy coral, macro images of pink-eyed gobies, yawning frogfish, mating sting rays and a dentist's close-up of a triggerfish's scary teeth.
