Differential Equations with Mathematica, Fourth Edition Martha L. Abell, James P. Braselton

Differential Equations with Mathematica, Fourth Edition is a supplementing reference which uses the fundamental concepts of the popular platform to solve (analytically, numerically, and/or graphically) differential equations of interest to students, instructors, and scientists.

Mathematica's diversity makes it particularly well suited to performing calculations encountered when solving many ordinary and partial differential equations. In some cases, Mathematica's built-in functions can immediately solve a differential equation by providing an explicit, implicit, or numerical solution. In other cases, mathematica can be used to perform the calculations encountered when solving a differential equation.

Because one goal of elementary differential equations courses is to introduce students to basic methods and algorithms so that they gain proficiency in them, nearly every topic covered this book introduces basic commands, also including typical examples of their application. A study of differential equations relies on concepts from calculus and linear algebra, so this text also includes discussions of relevant commands useful in those areas. In many cases, seeing a solution graphically is most meaningful, so the book relies heavily on Mathematica's outstanding graphics capabilities.

- Demonstrates how to take advantage of the advanced features of Mathematica 10
- Introduces the fundamental theory of ordinary and partial differential equations using Mathematica to solve typical problems of interest to students, instructors, scientists, and practitioners in many fields
- Showcases practical applications and case studies drawn from biology, physics, and engineering

From reader reviews:

Mario Rice:

The book Differential Equations with Mathematica, Fourth Edition make one feel enjoy for your spare time. You may use to make your capable much more increase. Book can to become your best friend when you getting pressure or having big problem using your subject. If you can make reading a book Differential Equations with Mathematica, Fourth Edition to be your habit, you can get a lot more advantages, like add your current capable, increase your knowledge about some or all subjects. You may know everything if you like available and read a e-book Differential Equations with Mathematica, Fourth Edition. Kinds of book are several. It means that, science book or encyclopedia or others. So , how do you think about this publication?

Sergio Hawkinson:

Reading a book can be one of a lot of task that everyone in the world adores. Do you like reading book so. There are a lot of reasons why people fantastic. First reading a reserve will give you a lot of new facts. When you read a book you will get new information due to the fact book is one of many ways to share the information as well as their idea. Second, looking at a book will make an individual more imaginative. When you examining a book especially tale fantasy book the author will bring someone to imagine the story how the figures do it anything. Third, you may share your knowledge to other people. When you read this Differential Equations with Mathematica, Fourth Edition, you are able to tells your family, friends in addition to soon about yours guide. Your knowledge can inspire the others, make them reading a e-book.

Stephen Mosley:

People live in this new morning of lifestyle always try to and must have the time or they will get wide range of stress from both day to day life and work. So , whenever we ask do people have time, we will say absolutely without a doubt. People is human not really a huge robot. Then we question again, what kind of activity are there when the spare time coming to a person of course your answer may unlimited right. Then ever try this one, reading books. It can be your alternative with spending your spare time, typically the book you have read is actually Differential Equations with Mathematica, Fourth Edition.

Joseph Mesta:

Your reading 6th sense will not betray you actually, why because this Differential Equations with Mathematica, Fourth Edition reserve written by well-known writer who knows well how to make book that may be understand by anyone who read the book. Written throughout good manner for you, still dripping wet every ideas and creating skill only for eliminate your personal hunger then you still hesitation Differential Equations with Mathematica, Fourth Edition as good book not only by the cover but also with the content. This is one e-book that can break don't determine book by its handle, so do you still needing another sixth sense to pick this particular!? Oh come on your examining sixth sense already alerted you so why you have to listening to a different sixth sense.
