Statistics Using Stata: An Integrative Approach

Sharon Lawner Weinberg, Sarah Knapp Abramowitz

Statistics Using Stata: An Integrative Approach Sharon Lawner Weinberg, Sarah Knapp Abramowitz
Engaging and accessible to students from a wide variety of mathematical backgrounds, *Statistics Using Stata* combines the teaching of statistical concepts with the acquisition of the popular Stata software package. It closely aligns Stata commands with numerous examples based on real data, enabling students to develop a deep understanding of statistics in a way that reflects statistical practice. Capitalizing on the fact that Stata has both a menu-driven 'point and click' and program syntax interface, the text guides students effectively from the comfortable 'point and click' environment to the beginnings of statistical programming. Its comprehensive coverage of essential topics gives instructors flexibility in curriculum planning and provides students with more advanced material to prepare them for future work. Online resources - including complete solutions to exercises, PowerPoint slides, and Stata syntax (do-files) for each chapter - allow students to review independently and adapt codes to solve new problems, reinforcing their programming skills.
