Beurling Generalized Numbers (Mathematical Surveys and Monographs)

Harold G. Diamond, Wen-Bin Zhang

Beurling Generalized Numbers (Mathematical Surveys and Monographs) Harold G. Diamond, Wen-Bin Zhang

Generalized numbers" is a multiplicative structure introduced by A. Beurling to study how independent prime number theory is from the additivity of the natural numbers. The results and techniques of this theory apply to other systems having the character of prime numbers and integers; for example, it is used in the study of the prime number theorem (PNT) for ideals of algebraic number fields. Using both analytic and elementary methods, this book presents many old and new theorems, including several of the authors' results, and many examples of extremal behavior of g-number systems. Also, the authors give detailed accounts of the L^2 PNT theorem of J. P. Kahane and of the example created with H. L. Montgomery, showing that additive structure is needed for proving the Riemann hypothesis. Other interesting topics discussed are propositions "equivalent" to the PNT, the role of multiplicative convolution and Chebyshev's prime number formula for g-numbers, and how Beurling theory provides an interpretation of the smooth number formulas of Dickman and de Bruijn.

From reader reviews:

James Oliver:

Have you spare time to get a day? What do you do when you have more or little spare time? Sure, you can choose the suitable activity for spend your time. Any person spent their very own spare time to take a wander, shopping, or went to the particular Mall. How about open or perhaps read a book allowed Beurling Generalized Numbers (Mathematical Surveys and Monographs)? Maybe it is for being best activity for you. You realize beside you can spend your time with the favorite's book, you can cleverer than before. Do you agree with it is opinion or you have other opinion?

Kristy Taylor:

Hey guys, do you desires to finds a new book to learn? May be the book with the concept Beurling Generalized Numbers (Mathematical Surveys and Monographs) suitable to you? Often the book was written by popular writer in this era. The particular book untitled Beurling Generalized Numbers (Mathematical Surveys and Monographs) is the one of several books this everyone read now. This particular book was inspired many men and women in the world. When you read this guide you will enter the new age that you ever know prior to. The author explained their strategy in the simple way, so all of people can easily to comprehend the core of this book. This book will give you a lot of information about this world now. So that you can see the represented of the world on this book.

Sarah Creamer:

Do you have something that that suits you such as book? The publication lovers usually prefer to select book like comic, small story and the biggest you are novel. Now, why not striving Beurling Generalized Numbers (Mathematical Surveys and Monographs) that give your entertainment preference will be satisfied by means of reading this book. Reading practice all over the world can be said as the means for people to know world a great deal better then how they react toward the world. It can't be claimed constantly that reading addiction only for the geeky man but for all of you who wants to be success person. So , for every you who want to start reading through as your good habit, you could pick Beurling Generalized Numbers (Mathematical Surveys and Monographs) become your own personal starter.

Benita Newton:

In this age globalization it is important to someone to receive information. The information will make anyone to understand the condition of the world. The healthiness of the world makes the information easier to share. You can find a lot of sources to get information example: internet, magazine, book, and soon. You will observe that now, a lot of publisher that print many kinds of book. Often the book that recommended to you personally is Beurling Generalized Numbers (Mathematical Surveys and Monographs) this e-book consist a lot of the information of the condition of this world now. This book was represented how do the world has grown up. The dialect styles that writer use for explain it is easy to understand. The writer made

some research when he makes this book. That's why this book suited all of you.
