**Genesis - Revisited : A Re-look at The Beginning of Time: Part - One** Mr. Raja Daulat ADV.

One of the greatest controversies of our times is about the origins of the universe and how everything that exists on earth and in the universe came into being. Needless to say that there are conflicting opinions on this subject since no eye has even seen it happen.

A large group of scientists are of the opinion that the universe came into being as a consequence of the big bang which took place 14 billion years ago. But Christians; who form the major part of the world population, believe that the whole universe and the earth were created by God during a span of 6 days as stated in the Holy Bible. Similarly people of other faiths have their own beliefs. The dilemma is - who is right?

This book verifies the correctness of the Genesis version of creation in the light of recent scientific findings pertaining to the beginning of the universe, which have been ratified by various findings by NASA and European Space Agency.
