## **Defensive (anti-herbivory) Coloration in Land Plants** Simcha Lev-Yadun

This book presents visual plant defenses (camouflage, mimicry and aposematism via coloration, morphology and even movement) against herbivores. It is mainly an ideological monograph, a manifesto representing my current understanding on defensive plant coloration and related issues. The book is not the final word in anything, but rather the beginning of many things. It aims to establish visual anti-herbivory defense as an integral organ of botany, or plant science as it is commonly called today. I think that like in animals, many types of plant coloration can be explained by selection associated with the sensory/cognitive systems of herbivores and predators to reduce herbivory. It is intended to intrigue and stimulate students of botany/plant science and plant/animal interactions for a very long time. This book is tailored to a readership of biologists and naturalists of all kinds and levels, and more specifically for botanists, ecologists, evolutionists and to those interested in plant/animal interactions. It is written from the point of view of a naturalist, ecologist and evolutionary biologist that I hold, considering natural selection as the main although not the only drive for evolution. According to this perspective, factors such as chance, founder effects, genetic drift and various stochastic processes that may and do influence characters found in specific genotypes, are not comparable in their power and influence to the common outcomes of natural selection, especially manifested when very many species belonging to different plant families, with very different and separate evolutionary histories, arrive at the same adaptation, something that characterizes many of the visual patterns and proposed adaptations described and discussed in this book. Many of the discussed visual defensive mechanisms are aimed at operating before the plants are damaged, i.e., to be their first line of defense. In this respect, I think that the name of the book by Ruxton et al. (2004) "Avoiding Attack" is an excellent phrase for the assembly of the best types of defensive tactics. While discussing anti-herbivory, I do remember, study and teach physiological/developmental aspects of some of the discussed coloration patterns, and I am fully aware of the simultaneous and diverse functions of many plant characters in addition to defense.

### **From reader reviews:**

#### **Jesus Puga:**

Nowadays reading books be than want or need but also get a life style. This reading addiction give you lot of advantages. The advantages you got of course the knowledge your information inside the book which improve your knowledge and information. The details you get based on what kind of guide you read, if you want send more knowledge just go with schooling books but if you want truly feel happy read one using theme for entertaining for example comic or novel. Often the Defensive (anti-herbivory) Coloration in Land Plants is kind of book which is giving the reader capricious experience.

#### **Bethel Stockton:**

Are you kind of stressful person, only have 10 or 15 minute in your moment to upgrading your mind skill or thinking skill also analytical thinking? Then you are experiencing problem with the book when compared with can satisfy your small amount of time to read it because pretty much everything time you only find publication that need more time to be read. Defensive (anti-herbivory) Coloration in Land Plants can be your answer since it can be read by you who have those short free time problems.

#### **Gussie Steller:**

This Defensive (anti-herbivory) Coloration in Land Plants is brand-new way for you who has attention to look for some information mainly because it relief your hunger of knowledge. Getting deeper you on it getting knowledge more you know or perhaps you who still having little digest in reading this Defensive (anti-herbivory) Coloration in Land Plants can be the light food for yourself because the information inside this kind of book is easy to get by anyone. These books build itself in the form which can be reachable by anyone, yep I mean in the e-book application form. People who think that in reserve form make them feel drowsy even dizzy this guide is the answer. So you cannot find any in reading a reserve especially this one. You can find actually looking for. It should be here for you. So , don't miss it! Just read this e-book variety for your better life and also knowledge.

#### **Joseph Bateman:**

In this particular era which is the greater person or who has ability in doing something more are more precious than other. Do you want to become among it? It is just simple way to have that. What you must do is just spending your time very little but quite enough to enjoy a look at some books. One of several books in the top checklist in your reading list is definitely Defensive (anti-herbivory) Coloration in Land Plants. This book which is qualified as The Hungry Hills can get you closer in turning into precious person. By looking way up and review this book you can get many advantages.
