## **A-level Questions and Answers Physics ('A' Level Questions and Answers Series) Graham Booth**

Providing questions from past exam papers as well as new questions set by actual A Level examiners, this physics book is one of a series. The authors who are all either Chief Examiners or Examiners, have prepared answers and a full mark scheme for each of the questions. They also include their tips on what the examiner is looking for and how to avoid the most commonly made mistakes. Questions are divided into topics with a brief revision summary for each topic, and all the answers are at the back of the book, thus encouraging the student to attempt the questions before referring to the answers. Each book has a general introduction which includes advice on revision and exam technique as well as outlining the types of question likely to be faced. The series is suitable for all A Level boards and Scottish Higher papers, and is a recommended complement to "Letts A Level Study Guides".
