Musculoskeletal X-Rays for Medical Students and Trainees

Andrew K. Brown, David G. King

Musculoskeletal X-Rays for Medical Students and Trainees Andrew K. Brown, David G. King
Musculoskeletal X-rays for Medical Students provides the key principles and skills needed for the assessment of normal and abnormal musculoskeletal radiographs. With a focus on concise information and clear visual presentation, it uses a unique colour overlay system to clearly present abnormalities.

Musculoskeletal X-rays for Medical Students:

- Presents each radiograph twice, side by side – once as would be seen in a clinical setting and again with clearly highlighted anatomy or pathology
- Focuses on radiographic appearances and abnormalities seen in common clinical presentations, highlighting key learning points relevant to each condition
- Covers introductory principles, normal anatomy and common pathologies, in addition to disease-specific sections covering adult and paediatric practice
- Includes self-assessment to test knowledge and presentation techniques

Musculoskeletal X-rays for Medical Students is designed for medical students, junior doctors, nurses and radiographers, and is ideal for both study and clinical reference.
