Quickly master the skills, techniques, and tools you need to create cutting-edge photorealistic 3D images

Cash in on the booming market for 3D photorealism with the 3D Photorealism Toolkit, written by the head of a successful West Coast 3D photorealistic modeling studio. You'll quickly master all the modeling, surfacing, staging, and lighting techniques needed to create images and scenes that look realistic enough to fool the most discriminating eye. With the help of dozens of examples executed in LightWave, 3D Studio Max, Form Z, ElectricImage, Alias, SoftImage, Strata and more, Bill Fleming shows you how to:

- * Add realistic imperfections, bevels, seams, nuts, bolts, and wear and tear to models
- * Create a wide variety of material textures, including woods, metals, glass, plastics, paper, fabrics, skin, and more
- * Enliven surfaces with color, luminosity, diffusion, secularity, glossiness, reflection, transparency, and bump
- * Use camera position and focus to create the right mood
- * Create lighting effects for every occasion

The 3D Photorealism Toolkit also contains a gold mine of valuable artist's resources, including a comprehensive listing of resources for visual modeling reference; an index of surface attributes for 30 common metals and 15 types of plastic and rubber; an index of refraction values for transparent materials; and a comprehensive chart listing light sources and their Kelvin ratings.
