Anti-inflammatory Nutraceuticals and Chronic Diseases (Advances in Experimental Medicine and Biology)

Anti-inflammatory Nutraceuticals and Chronic Diseases (Advances in Experimental Medicine and Biology)

This comprehensive volume focuses on anti-inflammatory nutraceuticals and their role in various chronic diseases. Food and Drug Administration (FDA) approved drugs such as steroids, non-steroidal anti-inflammatory drugs (NSAIDs), statins and metformin have been shown to modulate inflammatory pathways, but their long-term intake has been associated with numerous side effects. This means that there is enormous potential for dietary agents that can modulate inflammatory pathways in humans. Leading experts describe the latest research on the role of anti-inflammatory nutraceuticals in preventing and treating chronic diseases.
