Hepatocellular Carcinoma: Methods and Protocols (Methods in Molecular Medicine)

Hepatocellular Carcinoma: Methods and Protocols (Methods in Molecular Medicine)

Hepatocellular Carcinoma: Methods and Protocols outlines the research methods applied in the laboratories and clinics of those scientists and clinicians interested in the understanding and clinical management of patients with hepatocellular carcinoma (HCC). Part I, The Clinical Problem, has been contributed by two leading clinical groups who have identified and addressed problem areas related to the management of HCC patients. Various treatment modalities are discussed and emphasis is placed on the limitations they experienced. Part II, HCC Carcinogenesis, reviews the main etiological factors related to hepatitis B and hepatitis C. Part III, Molecular and Biological Characteristics, provides insight into the molecular changes associated with HCC, including tumor-suppressor genes, oncogenes, adhesion molecules, matrix metalloproteinase, and novel genes and markers. Part IV, HCC Gene Therapy, addresses gene therapy approaches to treating hepatocellular carcinoma. It includes the use of various vectors, such as lipids, viruses such as adenoviruses and baculoviruses, and virus detection using electron microscopy assessment. The use of adenovirus with specific promoters, such as AFP, is also included. Preclinical and clinical data on the killing of cancer cells using tumor-suppressor genes, antisense to growth factors, immunogene therapy, or virus-directed enzyme prodrug therapy are addressed.

From reader reviews:

Bobby Bagwell:

Do you have favorite book? In case you have, what is your favorite's book? E-book is very important thing for us to find out everything in the world. Each reserve has different aim as well as goal; it means that guide has different type. Some people truly feel enjoy to spend their time to read a book. They are really reading whatever they get because their hobby is actually reading a book. What about the person who don't like studying a book? Sometime, man or woman feel need book after they found difficult problem or exercise. Well, probably you will need this Hepatocellular Carcinoma: Methods and Protocols (Methods in Molecular Medicine).

Terry Snider:

Have you spare time for a day? What do you do when you have far more or little spare time? Yeah, you can choose the suitable activity regarding spend your time. Any person spent their particular spare time to take a wander, shopping, or went to typically the Mall. How about open as well as read a book allowed Hepatocellular Carcinoma: Methods and Protocols (Methods in Molecular Medicine)? Maybe it is to be best activity for you. You recognize beside you can spend your time along with your favorite's book, you can more intelligent than before. Do you agree with their opinion or you have various other opinion?

Ronnie Correa:

The actual book Hepatocellular Carcinoma: Methods and Protocols (Methods in Molecular Medicine) will bring that you the new experience of reading any book. The author style to explain the idea is very unique. If you try to find new book to see, this book very ideal to you. The book Hepatocellular Carcinoma: Methods and Protocols (Methods in Molecular Medicine) is much recommended to you to learn. You can also get the e-book in the official web site, so you can easier to read the book.

Joyce Tower:

A lot of people said that they feel bored stiff when they reading a book. They are directly felt the item when they get a half parts of the book. You can choose the actual book Hepatocellular Carcinoma: Methods and Protocols (Methods in Molecular Medicine) to make your reading is interesting. Your own skill of reading skill is developing when you just like reading. Try to choose very simple book to make you enjoy to see it and mingle the sensation about book and reading especially. It is to be very first opinion for you to like to open up a book and read it. Beside that the e-book Hepatocellular Carcinoma: Methods and Protocols (Methods in Molecular Medicine) can to be your friend when you're truly feel alone and confuse with what must you're doing of these time.
