## **Hunters in the Trees: a Natural History of Arboreal Snakes** Richard A. Sajdak

Hunters in the Trees: A Natural History of Arboreal Snakes is a readable up-to-the-minute compendium of what we know about tree snakes written in a clear, nontechnical style for an adult audience of nature lovers and reptile aficionados. The book is worldwide in scope, discussing the diversity of arboreal snakes and their biology. How does one hide when the enemy may lurk above, beside or below? What sorts of display tactics might serve best for defense and how do they differ from those used by ground dwelling snakes? How does life in the trees affect vision? What kinds of temperature and moisture conditions must an arboreal snake contend with? How do acrobatics affect blood pressure? How does one find a mate in the canopy? What happens if a snake falls? With questions like these, Sajdak takes us into a realm as broad as all of herpetology. From the foreword by William W. Lamar, University of Texas at Tyler
