The Statistical Analysis of Recurrent Events (Statistics for Biology and Health)

Richard J. Cook, Jerald Lawless

The Statistical Analysis of Recurrent Events (Statistics for Biology and Health) Richard J. Cook, Jerald Lawless

This book presents models and statistical methods for the analysis of recurrent event data. The authors provide broad, detailed coverage of the major approaches to analysis, while emphasizing the modeling assumptions that they are based on. More general intensity-based models are also considered, as well as simpler models that focus on rate or mean functions. Parametric, nonparametric and semiparametric methodologies are all covered, with procedures for estimation, testing and model checking.

From reader reviews:

Frank Lach:

Book is actually written, printed, or descriptive for everything. You can understand everything you want by a e-book. Book has a different type. As we know that book is important issue to bring us around the world. Beside that you can your reading skill was fluently. A guide The Statistical Analysis of Recurrent Events (Statistics for Biology and Health) will make you to end up being smarter. You can feel much more confidence if you can know about almost everything. But some of you think that will open or reading a book make you bored. It is not make you fun. Why they can be thought like that? Have you trying to find best book or acceptable book with you?

Cora Spillane:

Reading a book can be one of a lot of pastime that everyone in the world adores. Do you like reading book so. There are a lot of reasons why people like it. First reading a reserve will give you a lot of new data. When you read a reserve you will get new information mainly because book is one of many ways to share the information or perhaps their idea. Second, reading a book will make anyone more imaginative. When you looking at a book especially fictional book the author will bring you to imagine the story how the people do it anything. Third, you are able to share your knowledge to other people. When you read this The Statistical Analysis of Recurrent Events (Statistics for Biology and Health), you could tells your family, friends and also soon about yours publication. Your knowledge can inspire the mediocre, make them reading a publication.

Tanya Caggiano:

Exactly why? Because this The Statistical Analysis of Recurrent Events (Statistics for Biology and Health) is an unordinary book that the inside of the reserve waiting for you to snap that but latter it will distress you with the secret it inside. Reading this book adjacent to it was fantastic author who also write the book in such amazing way makes the content inside of easier to understand, entertaining technique but still convey the meaning entirely. So , it is good for you because of not hesitating having this nowadays or you going to regret it. This amazing book will give you a lot of rewards than the other book get such as help improving your talent and your critical thinking means. So , still want to hold off having that book? If I ended up you I will go to the publication store hurriedly.

Vanessa Kistler:

Playing with family in a park, coming to see the sea world or hanging out with good friends is thing that usually you will have done when you have spare time, in that case why you don't try factor that really opposite from that. One particular activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love The Statistical Analysis of Recurrent Events (Statistics for Biology and Health), you may enjoy both. It is very good combination right,

you still wish to miss it? What kind of hang type is it? Oh come on its mind hangout men. What? Still don't have it, oh come on its identified as reading friends.
