*Radmila Bulajich Manfrino, José Antonio Gómez Ortega, Rogelio Valdez Delgado*

**Topics in Algebra and Analysis: Preparing for the Mathematical Olympiad** Radmila Bulajich Manfrino, José Antonio Gómez Ortega, Rogelio Valdez Delgado

The techniques presented here are useful for solving mathematical contest problems in algebra and analysis. Most of the examples and exercises that appear in the book originate from mathematical Olympiad competitions around the world.

In the first four chapters the authors cover material for competitions at high school level. The level advances with the chapters. The topics explored include polynomials, functional equations, sequences and an elementary treatment of complex numbers. The final chapters provide a comprehensive list of problems posed at national and international contests in recent years, and solutions to all exercises and problems presented in the book.

It helps students in preparing for national and international mathematical contests from high school level to more advanced competitions and will also be useful for their first year of mathematical studies at the university. It will be of interest to teachers in college and university level, and trainers of the mathematical Olympiads.

### **From reader reviews:**

#### **Clarence Lowery:**

The book Topics in Algebra and Analysis: Preparing for the Mathematical Olympiad can give more knowledge and also the precise product information about everything you want. So just why must we leave the good thing like a book Topics in Algebra and Analysis: Preparing for the Mathematical Olympiad? Some of you have a different opinion about guide. But one aim that book can give many details for us. It is absolutely suitable. Right now, try to closer with the book. Knowledge or information that you take for that, you are able to give for each other; it is possible to share all of these. Book Topics in Algebra and Analysis: Preparing for the Mathematical Olympiad has simple shape however you know: it has great and big function for you. You can appear the enormous world by open and read a guide. So it is very wonderful.

#### **Rene Moore:**

Reading a reserve can be one of a lot of action that everyone in the world enjoys. Do you like reading book and so. There are a lot of reasons why people enjoy it. First reading a publication will give you a lot of new facts. When you read a publication you will get new information due to the fact book is one of various ways to share the information or their idea. Second, reading a book will make an individual more imaginative. When you looking at a book especially fiction book the author will bring someone to imagine the story how the personas do it anything. Third, you could share your knowledge to other people. When you read this Topics in Algebra and Analysis: Preparing for the Mathematical Olympiad, it is possible to tells your family, friends as well as soon about yours publication. Your knowledge can inspire others, make them reading a reserve.

#### **Anna Bailey:**

The guide untitled Topics in Algebra and Analysis: Preparing for the Mathematical Olympiad is the reserve that recommended to you to read. You can see the quality of the reserve content that will be shown to you. The language that publisher use to explained their way of doing something is easily to understand. The article writer was did a lot of study when write the book, and so the information that they share for you is absolutely accurate. You also could possibly get the e-book of Topics in Algebra and Analysis: Preparing for the Mathematical Olympiad from the publisher to make you much more enjoy free time.

#### **Richard King:**

Many people said that they feel uninterested when they reading a reserve. They are directly felt this when they get a half parts of the book. You can choose the particular book Topics in Algebra and Analysis: Preparing for the Mathematical Olympiad to make your own personal reading is interesting. Your current skill of reading expertise is developing when you including reading. Try to choose straightforward book to make you enjoy you just read it and mingle the feeling about book and examining especially. It is to be very first opinion for you to like to start a book and examine it. Beside that the book Topics in Algebra and

Analysis: Preparing for the Mathematical Olympiad can to be a newly purchased friend when you're experience alone and confuse in doing what must you're doing of this time.
