Elizabeth, Just Sixteen

Cecilia Paul

Elizabeth, Just Sixteen Cecilia Paul

Elizabeth Appleton is a sweet and easy-going adolescent. But as she turns sixteen, she discovers something so devastating about herself that her whole world is turned upside down. Elizabeth has been born without a womb or a vagina and is diagnosed with MRKH, an unusual congenital disorder that affects the female reproductive tract. Frightened and confused, Elizabeth must struggle to understand how she can still be a girl but no longer a 'normal' one. As she questions everyone and everything around her - her burgeoning sexuality, her gender, her hopes for the future - Elizabeth must fight against the shame and betrayal she feels if she is to ever become the woman she has always hoped to be. In her first novel, Cecilia Paul, now a retired expert in the field of MRKH, sensitively explores and illuminates this complex and often emotionally fraught medical condition, in order to raise public awareness of MRKH and to support those affected by it.
