Michael D., PhD Dahnke, H. Michael, PhD, RN, FAAN Dreher

Philosophy of Science for Nursing Practice: Concepts and Application Michael D., PhD Dahnke, H. Michael, PhD, RN, FAAN Dreher

Named a 2013 Doody's Core Title!

"A challenge ahead for nursing is to take the path of most resistance rather than the easier road of least resistance. The debate needs to continue...[by focusing on] whether nursing is teaching an appropriate level of inquiry including philosophy and methodologies specific to those real-world, rapidly changing conditions that characterize today's practice environment."

From the Foreword by **Sally J. Reel**, PhD, RN, FNP, BC, FAAN, FAANP

University of Arizona College of Nursing

"I have taught a philosophy of science course intermittently for about 20 years. *Philosophy of Science for Nursing Practice* is not only the most succinct, insightful, well-organized presentation of information I've yet seen, but drives thinking to where it ought to be."

Laura Cox Dzurec, PhD, PMHCNS-BC

Dean and Professor

Kent State University

College of Nursing

"This appears to be the first book that focuses on the philosophy of science and its application to practice doctorates. The authors assume readers may not have a formal background in the philosophy of science, and write in a conversational tone with a minimum of difficult terminology. They discuss the current state of DNP education in a way that can foster discourse and debate." **Score: 97, 5 Stars. --Doody's Medical Reviews**

Tailored for both DNP and PhD doctoral nursing programs, this text is the first to focus on philosophy of science applications to the discipline of nursing. The authors, a philosopher and a nurse-scholar who co-teach

the course upon which this volume is based, address a growing need for increased philosophy of science content in evolving DNP programs, as well as practice-oriented research considerations for this discipline.

The volume presents a creative use of the social, political, and historical content in which nursing has evolved. As a whole, this extremely important text reassures the student of the fluid and palpable connections between philosophy of science and nursing science and practice.

Key Features:

- Explores the concept of nursing as a practice profession and assesses how much philosophy of science is needed for doctoral nursing students.
- Examines the practical application of the philosophy of science to both DNP and PhD students.
- Addresses the basic principles and concepts of the philosophy of science and their practical application for contemporary practice inquiry.
- Provides an overview of the century-long path to the development of nursing science that is an essential "bridge" to the philosophy of science content and serves as a "next step" towards building a nursing epistemology
- Reinforces important connections between the philosophy of science to nursing science and nursing practice.
