The global trend of increasingly ageing societies and long term illnesses has meant a growth in demand for intensive care resources. This book advises on leadership and organizational development of intensive care units, in order to give best practices for governance, performance, emergency response and safety. Written by international experts in the field, each chapter allows researchers, clinicians and service providers worldwide to be able to refer to this single reference book. In seven parts, the volume will tackle aspects of intensive care management in both global and local contexts, and interrogate the key concerns that service providers face. It works as an informative guide for the practical administration of intensive care, as well as being international in its design and information.
