Mending the Ozone Hole: Science, Technology, and Policy Arjun Makhijani, Kevin Gurney

There is a widely held misconception that the problem of ozone depletion in the upper atmosphere has been solved. In fact, while CFC production has been reduced in many places, the ongoing emissions of chemicals and the production of other long-lived ozone-depleting substances mean a decade will pass before the levels of ozone-depleting chlorine in the earth's atmosphere begin to decline. As a result, serious ozone depletion above the southern pole and elsewhere is expected to continue for decades, posing a severe threat to human health and to ecosystems. In this comprehensive overview, Makhijani and Gurney detail the most current knowledge about stratospheric ozone depletion. More than a review of the evolution of the ozone problem, *Mending the Ozone Hole* provides an objective and stimulating look at current debates surrounding the research, the technology development, and the policy-making aimed at eliminating ozone-depleting substances. The book begins by clearly delineating the current status of stratospheric ozone loss and its epidemiological and ecological consequences -- including DNA damage, effects on the human immune system, skin cancer, the human eye, plant and aquatic life, and potential impacts of persistent severe ozone depletion. It then takes up the many sources of emissions of ozone-depleting compounds and of the alternative technologies that might reasonably replace them. This is followed by an examination of national and international policy development and industry responses, projections on the levels of ozone-depleting chlorine, assessments of various ozone-protection measures, and a consideration of the context in which policy is made. Finally, the research findings are summarized and specific recommendations for protecting the ozone layer are offered.

From reader reviews:

Barbara Harp:

What do you concerning book? It is not important to you? Or just adding material if you want something to explain what the ones you have problem? How about your free time? Or are you busy man? If you don't have spare time to complete others business, it is make you feel bored faster. And you have spare time? What did you do? Every person has many questions above. They need to answer that question due to the fact just their can do that. It said that about guide. Book is familiar on every person. Yes, it is proper. Because start from on pre-school until university need this kind of Mending the Ozone Hole: Science, Technology, and Policy to read.

Salvador Swain:

The book untitled Mending the Ozone Hole: Science, Technology, and Policy is the book that recommended to you you just read. You can see the quality of the guide content that will be shown to a person. The language that writer use to explained their way of doing something is easily to understand. The article author was did a lot of study when write the book, and so the information that they share to you personally is absolutely accurate. You also could possibly get the e-book of Mending the Ozone Hole: Science, Technology, and Policy from the publisher to make you much more enjoy free time.

William Stewart:

People live in this new time of lifestyle always try to and must have the spare time or they will get lots of stress from both daily life and work. So , whenever we ask do people have spare time, we will say absolutely without a doubt. People is human not really a robot. Then we consult again, what kind of activity have you got when the spare time coming to you of course your answer will unlimited right. Then do you try this one, reading publications. It can be your alternative within spending your spare time, often the book you have read is usually Mending the Ozone Hole: Science, Technology, and Policy.

Jeremy Hutchings:

As we know that book is vital thing to add our expertise for everything. By a reserve we can know everything you want. A book is a pair of written, printed, illustrated or blank sheet. Every year was exactly added. This reserve Mending the Ozone Hole: Science, Technology, and Policy was filled concerning science. Spend your time to add your knowledge about your research competence. Some people has diverse feel when they reading any book. If you know how big advantage of a book, you can truly feel enjoy to read a guide. In the modern era like today, many ways to get book that you wanted.
